

Agresti

Standing for safety, elegance and refinement since 1949, Florence-based Agresti skilfully handcrafts luxury safe boxes and other fine wooden furniture. The brand's unique concept sees secure safes hidden in precious wood cabinets with state-of-the-art mechanics and technologically

advanced Swiss-made rotors. Born as a leather goods artisan, Agresti subsequently specialised in the creation of treasure chests made from precious wood, lined and divided inside to store all types of jewels and precious objects. Today, the brand's skilled artisans transform the

highest quality materials into unique products – armoured cabinets with Swiss mechanisms for charging automatic watches; jewellery drawers with compartments equipped for collecting pens, watches and documents; refined items for cigars and games; and elegant wine cellars. The safes are equipped with facial recognition opening devices, as well as biometric or touch keyboards, to guarantee the highest security standards. Each product is handmade and can be customised according to your needs. Discover more from Agresti on the Third Floor.
